Proposal for Bug-Fix in Mobile App (Flutter)

Project Overview
This proposal outlines the scope of work, timeline, and budget for the bug-fix of a mobile app developed using Flutter. The app is currently experiencing a bug that prevents users from using the voice-to-text feature. The bug is causing the app to crash when users try to use the voice-to-text feature.

Scope of Work

The scope of work for this project includes the following:

- Investigating the error
- Identifying the root cause of the error
- Implementing the necessary fixes
- Performing thorough testing to ensure that the voice-to-text feature works correctly
- Building the app on Xcode iOS

Timeline

The project is expected to be completed within **2 days**. The following is a tentative timeline for the project:

- Day 1: Investigating the error, identifying the root cause of the error, and implementing the necessary fixes.
- Day 2: Performing thorough testing to ensure that the voice-to-text feature works correctly and building the app on Xcode iOS.

Budget

The total budget for this project is **$21.60**. The following is a breakdown of the budget:

Developer's hourly rate: **$1.80**
Number of hours worked: **12 hours**
Total budget: **$21.60**

Risks

There are a few risks associated with this project. One risk is that the bug may be more complex than initially thought. Another risk is that there may be compatibility issues with Xcode iOS. We will mitigate these risks by carefully investigating the error, identifying the root cause of the error, and performing thorough testing.

We appreciate your consideration of our proposal. Should you have any questions or require further clarification, please do not hesitate to reach out to us.
